639.916.1059 | dhruvchaudhari51659@gmail.com | Saskatoon, SK, Canada

EDUCATION

University of Saskatchewan

Jan. 2022 – Dec. 2026 (Expected)

Bachelor of Science in Computer Science, Minor: Mathematics

Saskatoon, SK

- **Coursework:** Intro to AI (CMPT 317), Cloud & Mobile Computing (CMPT 453), Algorithm Design (CMPT 360), Full Stack Web (CMPT 353), Software Engineering (CMPT 370/470)
- **In progress:** CCNA (Cisco Certified Network Associate), via a self-directed lab covering VLANs, OSPF, firewalls, and VoIP

EXPERIENCE

eHealth Saskatchewan

May 2024 – April 2025

IT Service Desk Analyst (Internship)

Saskatoon, SK

- Troubleshoot hardware, software, and network issues across enterprise cloud-connected systems, resolving 50+ tickets/month in a fast-paced IT environment.
- Documented incidents and resolutions in a ticketing system, improving team efficiency and reducing repeat issue rates.
- Collaborated with cross-functional IT teams to escalate and resolve complex infrastructure problems while minimizing user downtime.

University of Saskatchewan

Sept 2023 – April 2024

Grader, Math 110

Saskatoon, SK

- Evaluated 100+ student submissions per week with precision and provided detailed feedback; maintained confidentiality and academic integrity.

PROJECTS

Projectile Point Catalogue Management System | Node.js, Express, React, MySQL, Docker, REST

- Contributed as a Developer/Tester on a 13-person Agile team, building and testing backend API features across 5 incremental deliverables
- Built RESTful CRUD API endpoints for artifact and site data; implemented Docker containerization; wrote unit, integration, end-to-end, and coverage tests using Vitest
- Applied TDD, MVC architecture, and CI/CD pipeline; conducted load, stress, and UX non-functional testing to verify system performance under real conditions

Interactive DSA Lab | Python, Streamlit, pytest

- Implemented core data structures and algorithms from scratch (dynamic arrays, linked lists, hash tables, BST/AVL/red-black trees), each traced, animated, and benchmarked against the same code path the test suite runs
- Wrote a 1,275-test suite re-verifying every structural invariant after each operation; built a benchmark harness that least-squares fits measured timings to complexity curves instead of asserting Big-O without evidence

Channel-Based Q&A Platform | React.js, Node.js, MySQL

- Independently completed a full-stack development project within four weeks, demonstrating end-to-end proficiency from database design to UI
- Built a platform for users to ask and answer programming questions within topic-specific channels; implemented nested replies, full-text search, user account functionality, and a bookmark feature
- Introduced user classifications to enrich platform capabilities; designed a normalized MySQL schema for efficient data management

Doctor Finder Web Application | React.js, Node.js, MongoDB, Express, HTML/CSS

- Built a secure login/signup system, a doctor dashboard for appointment management, and a patient profile system, simplifying the process of finding the right doctor online

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, C, HTML/CSS, SQL

Cloud & Networking: GCP, REST APIs, gRPC, Docker, VLANs & OSPF, pfSense, AI/ML concepts

Frameworks & Tools: React.js, Node.js, Express.js, MongoDB, MySQL, Streamlit, Git/GitHub, Vitest, pytest

Practices: Agile/Scrum, Test-Driven Development, CI/CD, MVC Architecture, Code Reviews
