EDUCATION

University of Saskatchewan

Jan. 2022 – Dec. 2026 (Expected)

Bachelor of Science in Computer Science, Minor: Mathematics

Saskatoon, SK

- **Coursework:** Intro to AI (CMPT 317), Cloud & Mobile Computing (CMPT 453), Algorithm Design (CMPT 360), Full Stack Web (CMPT 353), Software Engineering (CMPT 370/470)

EXPERIENCE

eHealth Saskatchewan

May 2024 – April 2025

IT Service Desk Analyst (Internship)

Saskatoon, SK

- Troubleshoot hardware, software, and network issues across enterprise cloud-connected systems, resolving 50+ tickets/month in a fast-paced IT environment.
- Documented incidents and resolutions in a ticketing system, improving team efficiency and reducing repeat issue rates.
- Collaborated with cross-functional IT teams to escalate and resolve complex infrastructure problems while minimizing user downtime.

University of Saskatchewan

Sept 2023 – April 2024

Grader, Math 110

Saskatoon, SK

- Evaluated 100+ student submissions per week with precision and provided detailed feedback; maintained confidentiality and academic integrity.

PROJECTS

Projectile Point Catalogue Management System | *Node.js, Express, React, MySQL, Docker, REST*

- Contributed as a Developer/Tester on a 13-person Agile team, building and testing backend API features across 5 incremental deliverables
- Built RESTful CRUD API endpoints for artifact and site data; implemented Docker containerization; wrote unit, integration, end-to-end, and coverage tests using Vitest
- Applied TDD, MVC architecture, and CI/CD pipeline; conducted load, stress, and UX non-functional testing to verify system performance under real conditions
- Replaced a legacy archaeological database with a full-stack web app supporting artifact cataloguing, site management, aggregated statistics, and data import/export

Doctor Finder Web Application | *React.js, Node.js, MongoDB, Express, HTML/CSS*

- Built a secure login/signup system for user authentication; created a doctor dashboard for appointment management; added a patient profile system to improve platform engagement
- Developed doctor profiles with specialties, qualifications, and ratings; enhanced UX with appointment notes and patient ratings
- Delivered a user-friendly, full-stack web application that simplified the process of finding the right doctor online

Channel-Based Q&A Platform | *React.js, Node.js, MySQL*

- Independently completed a full-stack development project within four weeks, demonstrating end-to-end proficiency from database design to UI
- Built a platform for users to ask and answer programming questions within topic-specific channels; implemented nested replies, full-text search, user account functionality, and a bookmark feature
- Introduced user classifications to enrich platform capabilities; designed a normalized MySQL schema for efficient data management

TECHNICAL SKILLS

Languages : Python, Java, JavaScript, C, HTML/CSS, SQL

Cloud & AI : Google Cloud Platform (GCP), REST APIs, gRPC, Docker, basic AI/ML concepts

Frameworks & Tools: React.js, Node.js, Express.js, MongoDB, MySQL, Git/GitHub, Vitest

Practices : Agile/Scrum, Test-Driven Development, CI/CD, MVC Architecture, Code Reviews
